

# PhD Financial Engineer positions

***Location: Buenos Aires / New York***

If you are a strong PhD graduate in Physics, Mathematics or Chemistry with strong math skills, strong numerical capacities, good understanding of probability, good C++ and familiarity with Brownian Motion calculus, we can offer you a very good opportunity to work on derivative pricing and model validation for one of the best American Banks. Previous experience in the finance area is not required. Good written and verbal English communication skills are necessary.

If you are interested please send a one page CV and a summary of your PhD thesis to the following email: [jan.kuklinski@crisil.com](mailto:jan.kuklinski@crisil.com). Selected candidates will be contacted and invited to an introductory discussion via video Skype. Further the candidates will be asked to send a copy of their PhD thesis as an important part of the candidate evaluation will be focused on the PhD content.

CRISIL Global Research & Analytics (GR&A) is the one of the largest and top-ranked provider of high end research and analytics services to the world's leading commercial and investment banks, insurance companies, corporations, consulting firms, private equity players and asset management firms.
