

## CONTENTS

Preface	iii
St.D. Głazek <i>Program of the workshop</i>	1
L. Susskind and M. Burkardt <i>A model of mesons based on <math>\chi</math>SB in the light-front frame</i>	5
K.G. Wilson and D.G. Robertson <i>Light-front QCD and the Constituent Quark Model</i>	15
T.-M. Yan and T.S. Walhout <i>Heavy quark symmetry and chiral dynamics</i>	29
H.J. Weber <i>Nucleon structure functions and form factors in the Constituent Quark Model on the light-cone</i>	41
R.J. Perry <i>A naive confining potential</i>	56
J. Bartels <i>Low-<math>x</math> physics in deep inelastic scattering and the Regge limit in QCD</i>	71
L.N. Lipatov and A. Berera <i>Multi-color QCD and exactly solvable lattice theories</i>	84
G. McCartor <i>The vacuum in the light-cone representation</i>	95
A. Kalloniatis <i>A paradigm for solving the QCD zero mode problem in DLCQ</i>	101
B. Van de Sande <i>Spontaneous symmetry breaking in light-front field theory</i>	106
D. Robertson <i>Light-cone quantization of electrodynamics</i>	111
T. Heinzl <i>Light-front quantization of gauge theories in a finite volume</i>	117
J.P. Vary, T.J. Fields and H.J. Pirner <i>Massive Schwinger model for small fermion mass</i>	122

D. Wyler	
<i>Hadronic matrix elements</i>	127
A. Khodjamirian and R. Rückl	
<i>QCD sum rules for heavy meson form factors</i>	131
A. Harindranath	
<i>Parton model from field theory via light-front current algebra</i>	139
L. Susskind and P. Griffin	
<i>Partons and black holes</i>	144
K.G. Wilson and M. Brisudova	
<i><math>\chi</math>SB and light-front QCD</i>	166
M. Stingl	
<i>Systematic extended iterative solution for QCD</i>	182
J.M. Namysłowski	
<i>Condensates and confinement in QCD vertex functions</i>	188
R. Soldati	
<i>The Mandelstam-Leibbrandt prescription and DLCQ</i>	193
T. Walhout	
<i>Renormalization in an invariant light front picture</i>	198
C.-R. Ji	
<i>Self-energies and rotational symmetry</i>	203
St.D. Głazek	
<i>Similarity renormalization scheme</i>	208
A. Szczepaniak	
<i>Constituent quark structure</i>	213
N. Ligterink and B.L.G. Bakker	
<i>Feynman diagrams and light-cone time ordered diagrams</i>	218
S. Pinsky	
<i>Topology and confinement in light-front QCD</i>	223
A.Yu. Dubin	
<i>Light cone dynamics of the QCD string with quarks</i>	228
M. Burkardt	
<i>How to measure the <math>Q\bar{Q}</math> potential in a light-front calculation</i>	233

P. Griffin	
<i>Light-front Hamiltonian for transverse lattice QCD</i>	240
C. Martin	
<i>Gauge invariant variables for SU(2) Yang-Mills theory</i>	246
V.A. Karmanov	
<i>Explicitly covariant light-front dynamics and deuteron</i>	251
J.F. Mathiot	
<i>Meson Exchange Currents and electrodisintegration of the deuteron in the light-front dynamics</i>	256
A. Smirnov	
<i>Relativistic covariance and light-front electromagnetic vertex of a bound system</i>	262
Yu. Uzikov	
<i>D(e, ep)N* reaction and the NN*-structure of the deuteron</i>	267
E. Prokhvatilov	
<i>The limiting transition to the light-front Hamiltonian</i>	272
J. Hiller	
<i>The electron's anomalous moment in large-alpha QED: a progress report</i>	277
E. Ammons	
<i>Renormalized light-front Tamm-Dancoff approach to QED and Compton scattering</i>	282
A. Berera	
<i>Wave Function Properties in a High Energy Process</i>	285
R. Kirschner	
<i>High-energy scattering with flavour exchange and properties of reggeon interactions in QCD</i>	290
L. Szymanowski	
<i>Effective action for high-energy scattering in QCD</i>	295
E.A. Bartnik	
<i>SSB and effective interactions</i>	301
St.D. Głazek	
<i>Relativistic Nuclear Physics</i>	306
Schedule of Talks and Discussions	311
