Postdoctoral Position in Theoretical Physics

The Chair of the Theory of Elementary Particles and Interactions, Warsaw University, announces the opening of a postdoctoral position in theoretical particle physics starting in fall 2005, in the framework of the Maria Curie Research Training network CT-2004-503369 "The Quest for Unification: Theory Confronts Experiment" (http://www.cpht.polytechnique.fr/rtn_aef/rtn2/rtn2.html). The appointment will be for one year. For further extension, a possibility exists of applying for an Maria Curie Individual Fellowship.

The Particle Theory group includes Piotr Chankowski, Adam Falkowski, Bohdan Grzadkowski, Jan Kalinowski, Maria Krawczyk, Zygmunt Lalak, Mikolaj Misiak, Krzysztof Meissner, Marek Olechowski, Jacek Pawelczyk, Stefan Pokorski and Janusz Rosiek. Research interests of the group cover a broad range of particle physics, astro-particle physics and cosmology (neutrino physics, lepton physics, B physics, collider physics, grand unification, supersymmetry, supergravity, inflation, dark matter, dark energy, …)

Deadline for applications is December 15, 2004. Applicants should include curriculum vitae, list of publications and brief statement of research interest. In addition the candidates should arrange to have three letters of recommendation sent to:
Prof. S. Pokorski
