

8th Warsaw School of Statistical Physics

29 June – 5 July 2025, Chęciny, Poland

organized by the Institute of Theoretical Physics, Faculty of Physics, University of Warsaw

Invited courses:

Arezki Boudaoud École Polytechnique, Paris, France

Plant growth: a journey across scales

Julyan Cartwright Universidad de Granada, Spain

Pattern formation in nature

Fabian Essler University of Oxford, UK

Non-equilibrium dynamics of many-particle quantum systems

Randy Kamien University of Pennsylvania, Philadelphia, USA

The geometry and topology of soft materials

Karol Życzkowski Jagiellonian University, Kraków, Poland

*Seven-dimensional oranges, measure concentration,
and spectral statistics of evolution operators*
